PROFILE

I am Vincenzo Busalacchi, currently pursuing a degree in Computer Science at the University of Palermo. Alongside my academic pursuits, I am gaining valuable experience as a Front-End Developer and key knowledge of Back-End at StdoutSrl.

With this work experience, I have expanded my skill set and now I am eager for new opportunities to expand my know-how.

WORK EXPERIENCE

Front-End Developer

StdoutSrl   2023-Ongoing

My front-end development skills are on point. I'm fluent in the classics: HTML, CSS, and JavaScript. But that's not all! I've also mastered TypeScript for a more robust development experience.
For state management, Redux and React-Redux are my go-to tools, keeping my code organized and predictable. When it comes to building user interfaces, I'm a framework enthusiast. I've tackled projects with Angular, React (including React Native for mobile!), and even embraced the utility-first approach of Tailwind CSS. This diverse skillset allows me to adapt to any front-end challenge and craft user-friendly, interactive experiences.

SKILLS

- Html
- Css
- Javascript
- Typescript
- React and React-Native
- Angular
- TailwindCss
- Redux
- Linux
- Great team-worker
- Quick learner
- Flexible thinking in problem solving
- Persistent
- Methodic

MORE ABOUT ME

From a young age, I have been captivated by the world of technology, fostering a deep passion for all things computer-related. This passion has fueled my ability to quickly adapt and learn new concepts, particularly within the dynamic field of computer science.
A blend of tech enthusiasm, global awareness, and fitness passion defines me. I'm constantly immersed in the latest tech advancements, especially in the smartphone realm, making me the trusted person for tech advices.
Beyond the digital world, I'm an avid calisthenics practitioner, dedicated to maintaining a healthy lifestyle. This pursuit has instilled in me invaluable qualities like discipline, perseverance, and problem-solving, which I seamlessly apply to my coding endeavors.
This combination of interests and skills makes me a well-rounded individual, eager to contribute to a dynamic and innovative team.
